

LATIN AMERICAN APPLIED RESEARCH (ISSN 0327-0793)

Editor-in-Chief

Dr. José A. Bandoni (PLAPIQUI)

Associate Editors

Dr. Soledad Díaz (PLAPIQUI) and Dr. José Figueroa (UNS).

Subject Editors

Chemical Engineering:

Dr. José M. Pinto (Polytechnic University, USA) and Dr. Gregorio Meira (INTEC, Argentina),

Applied Chemistry:

Dr. Ricardo Gómez (Universidad Autónoma Metropolitana, Mexico) and Dr. Ana Lea Cukierman (Universidad Nacional de Buenos Aires, Argentina),

Heat and Mass Transfer:

Dr. Walter Ambrosini (University of Pisa, Italy) and Dr. Rubén Piacentini (IFIR, Argentina),

Applied Mechanics:

Dr. Alberto Cuitiño (Rutgers University, USA) and Dr. Eduardo Dvorkin (FUDETEC, Argentina),

Control and Information Processing:

Dr. Oscar Crisalle (University of Florida, USA) and Dr. Julio Braslavsky (University of Newcastle, Australia).

Editorial Management

Manuscripts: Dr. Mabel Sánchez, Dr. Patricia Hoch and Dr. Anibal Blanco.

Electronic Publishing

Prof. Eduardo Paolini, Dr. Diego Alonso and Dr. Federico Robbio (UNS, Argentina).

Subscription and Distribution

Ms. Ana María Olsen.

REVIEWERS (1999-2004)

Due to the confidentiality of the revision process some of the Subject Editors have not given the names of the reviewers, while others believe their names should be printed for acknowledgment. The Editorial Staff appreciate very much the help provided by the researchers mentioned below for carefully reading and revising manuscripts submitted to *Latin American Applied Research*. Moreover, the Editorial Staff greatly appreciate the work of many anonymous reviewers in the same period.

Dr. Osvaldo Agamennoni (Depto. de Ing. Eléctrica, Universidad Nacional del Sur –UNS-, Argentina),

Dr. Esteban Aglietti (CETMIC, La Plata, Argentina),

Dr. P. A. Aguirre (Instituto de Desarrollo y Diseño –INGAR-, Argentina),

Dr. Hugo Aimar (Universidad Nacional del Litoral –UNL-, Argentina),

Dr. José L. Alessandrini, (Instituto de Inv. Físicoquímicas Teor. y Aplicadas, Univ. Nacional de La Plata -UNLP-, Argentina),

Dr. David Angeli (Dipartimento di Sistemi e Informatica, Università di Firenze, Italy),

Ing. P. Anigstein (Universidad de Buenos Aires –UBA-, Argentina),

Dr. María Cristina Añón (Centro de Inv. y Desarrollo en Criotecnología de Alimentos, UNLP, Argentina)

Dr. Carlos Apesteguía (Instit. de Inv. Catálisis y Petroquímica –INCAPE-, Universidad Nacional del Litoral –UNL-, Argentina),

Dr. Pablo Arambel (Department of Electrical and Computer Engineering, Northeastern University, USA)

Dr. Mirta Aranguren (INTEMA, Mar del Plata, Argentina),

Dr. J. Asenjo (Departamento de Ingeniería Química, Universidad de Chile, Chile),

Dr. E. Aspé (Departamento de Ingeniería Química, Universidad de Concepción, Chile),

Dr. M. Aznar (Unicamp, Brazil),

Dr. Juan C. Balda (Department of Electrical Engineering, University of Arkansas, USA),
Dr. M. Baltanás (INTEC –Instituto para el Desarrollo Tecnológico, Argentina),
Dr. Alberto Bandoni (PLAPIQUI -Planta Piloto de Ingeniería Química-, Argentina),
Dr. Enrique J. Barán (Departamento de Química, UNLP, Argentina),
Dr. Fernando L. Bastian (Universidade Federal do Rio de Janeiro, Brazil),
Dr. Daniel Batistoni (Centro Atómico Constituyentes, Comisión Nacional de Energía Atómica, Argentina),
Dr. Fernando Battaglini (Depto. de Química Inorgánica, Analítica y Química Física, Universidad de Buenos Aires –UBA-, Argentina),
Dr. Iwona B. Beech (School of Pharmacy and Biomedical Sciences, University of Portsmouth, England),
Dr. L. Bergh (Departamento de Procesos Químicos, Biotecnológicos y Ambientales, Universidad Técnica Federico Santa María, Chile),
Dr. Daniel W. Berns (Universidad Nacional de la Patagonia S. Juan Bosco, Argentina),
Dr. Heraldo Biloni (Comisión de Investigaciones Científicas y Técnicas Pcia. de Buenos Aires –CIC-, Argentina),
Ing. José M. Bisang (Facultad de Ingeniería Química, UNL, Argentina),
Dr. A. Bonivardi (INTEC, Argentina), R. Bórquez (Universidad de Concepción, Chile),
Dr. Susana Bottini (Planta Piloto de Ingeniería Química –PLAPIQUI-, Argentina),
Dr. Richard Braatz (University of Illinois, USA),
Dr. Julio Braslavsky (University of Newcastle, Australia),
Dr. Verónica Bucalá (PLAPIQUI, Argentina),
Dr. D. B. Bukur (Texas A&M University, USA),
Dr. E. Campanella (INTEC, Argentina),
Dr. O. Campanella (University Massey, New Zealand),
Dr. E. Canales (Departamento de Ingeniería Química, Universidad de Concepción, Chile),
Dr. María C. Caracoche (Departamento de Física, UNLP, Argentina),
Dr. Carla M. Caramella, Department of Pharmaceutical Chemistry, University of Pavia, Italy),
Dr. Ricardo Carelli (Instituto de Automática -INAUT-, Argentina),
Dr. Ross Carlson (Department of Chemical and Biological Engineering, Montana State University, USA),
Dr. Miryan C. Cassanello (Facultad de Ciencias Exactas y Naturales, UBA, Argentina),
Dr. Marcelo Castier (Universidade Federal do Rio de Janeiro, Brazil),
Dr. Liliana Castro (Departamento de Matemática, UNS, Argentina),
Dr. Enrique M. Castrodeza (Universidade Federal do Rio de Janeiro, Brazil),
Dr. Hernán Cendra (Departamento de Matemática, UNS, Argentina),
Dr. Jaime Cerdá (Universidad Nacional del Litoral, INTEC, Argentina),
Dr. Bruno Cernuschi (UBA, Argentina),
Dr. R. Chamy (Escuela de Ingeniería Bioquímica, Universidad Católica de Valparaíso, Chile),
Dr. Guanrong Chen (City University of Hong Kong, China),
Dr. Héctor Chiacchiarini (Depto. de Ing. Eléctrica, UNS, Argentina)
Ing. Abel Chialvo (Facultad de Ingeniería Química, UNL, Argentina),
Dr. M. Chiovetta (INTEC, Argentina), Dr. E. Choren (LUZ, Venezuela),
Dr. R. Cid (Departamento de Físicoquímica, Universidad de Concepción, Chile),
Prof. Virginia Ciminelli (Universidade Federale de Minas Gerais, Brazil),
Dr. L. Cisternas (Departamento de Ingeniería Química, Universidad de Antofagasta, Chile),
Dr. J. Cooper (University of Connecticut, USA),
Prof. Avelino Corma-Canos (Instituto de Tecnología Química, Universidad Politécnica de Valencia, Spain),
Dr Vicente Costanza (Instituto de Desarrollo Tecnológico para la Industria Química –INTEC-, UNL, Argentina)
Dr. Oscar Crisalle (University of Florida, USA),
Dr. Marcos Crupkin (Instituto Nacional de Tecnología Industrial, Mar del Plata, Argentina),
Dr. F. Cubillos (Departamento de Ingeniería Química, Universidad de Santiago de Chile, Chile),
Dr. Carlos D'Attellis (Fundación Favaloro, Argentina),
Dr. Judith Desimoni (Departamento de Física, UNLP, Argentina)
Dr. Mario di Bernardo (University of Bristol, United Kingdom),
Dr. Soledad Díaz (Plapiqui, Argentina),
Dr. Denis Dochain (Université Catholique de Louvain, Belgium),
Dr. Rodolfo Dondo, (CERIDE, Universidad Nacional del Litoral, Santa Fe, Argentina),
Dr. Frank Doyle III (University of Delaware, USA),
Dr. Ricardo Durán (UBA, Argentina),
Dr. Blanca Escobar (Facultad de Ciencias Físicas y Matemáticas, Universidad de Chile, Chile),
Dr. Edgardo Eszter (University of Massachusetts, USA),
Dr. Alejandra Fanovich (INTEMA, Universidad Nacional de Mar del Plata, Mar del Plata, Argentina),
Dr. María Luján Ferreira (PLAPIQUI, Universidad Nacional del Sur, Bahía Blanca, Argentina),
Ing. Juan C. Ferreri (-ARN- Autoridad Regulatoria Nuclear, Argentina),

Dr. José Figueroa (Depto. Ing. Eléctrica, UNS, Argentina),
Dr. Guillermo García (-UNRC- Universidad Nacional de Río Cuarto, Argentina),
Dr. Rafael García (UBA, Argentina),
Dr. H. Ghandehari (Department of Pharmaceutical Sciences, University of Maryland, USA),
Dr. Alberto Giraldez (CONAE, Argentina),
Dr. Carlos A. Giúdice (Centro de Inv. y Desarrollo en Tecnología de Pinturas, La Plata, Argentina),
Dr. Juan C. Gómez (Universidad Nacional de Rosario –UNR-, Argentina),
Dr. Roberto V. González (UNR, Argentina),
Dr. E. Gonzo (INIQUI, Argentina),
Dr. A. Gordon (Departamento de Ingeniería Química, Universidad de Concepción, Chile),
Dr. R. Grau (INTEC, Argentina), Dr. Karolos Grigoriadis (University of Houston, USA),
Dr. I. E. Grossmann (Chemical Engineering Department, Carnegie Mellon University, USA),
Dr. Luis Gugliotta (INTEC, Santa Fe, Argentina),
Dr. K. Hanaki (Department of Urban Engineering, The University of Tokyo, Japan),
Dr. K. Hashimoto (University of Okayama, Japan), Dr. J. Hellendoorn (SIEMENS, Netherlands),
Dr. Munther Hassouneh (Institute for Systems Research, University of Maryland, College Park, USA),
Dr. Mónica Hernández Giménez (Centro Politécnico Superior, Universidad de Zaragoza, Spain),
Dr. Terry Herdman (Virginia Polytechnic Institute & State University, USA),
Dr. Elida B. Hermida (Centro Atómico Constituyentes, CONEA, Argentina),
Dr. L. Herrera (Departamento de Ingeniería Química, Universidad de Chile, Chile),
Dr. Patricia Hoch (Plapiqui, Argentina),
Dr. C. Hollot (University of Massachusetts, USA),
Dr. H. Irazoqui (INTEC, Argentina),
Dr. L. Jiménez (Departamento de Ingeniería Química, Universidad Rovira i Virgili, Spain),
Dr. Mario Jordán (Depto. de Ingeniería Eléctrica, UNS, Argentina),
Dr. Rafael Kelly (CINVESTAV, Mexico),
Dr. Sameh K. M. Kodsí (University of Waterloo, Ontario, Canada),
Dr. Ernst Kozeschnik (Graz Technical University, Institute Materials Science, Welding & Forming, Austria),
Dr. Benjamín Kuchen (INAUT, Argentina),
Dr. Satish Kumar (University of Minnesota Institute of Technology, USA),
Dr. Víctor Kuz (Instituto de Física de Líquidos y Sistemas Biológicos -IFLYSIB, La Plata, Argentina),
Dr. Gerardo Laferriere (Portland State University, USA),
Prof. Faiçal Larachi (Department of Chemical Engineering, Laval University, Quebec, Canada),
Dr. Hilda Larrondo (UNMP, Argentina),
Dr. Daniel Liberzon (Coordinated Science Laboratory, University of Illinois at Urbana-Champaign, USA),
Dr. Pedro Linares (Escuela Técnica Superior de Ingeniería ICAI, Universidad Pontificia Comillas de Madrid, Spain),
Dr. José Linares González (Estación Experimental del Zaidín, Granada, Spain),
Dr. Jorge Lozano (PLAPIQUI, Argentina),
Dr. F. Malone (University of Massachusetts, USA),
Dr. J. L. Mancilla Aguilar (UBA, Argentina),
Dr. Ricardo J. Mantz (Lab. Electr. Instr. y Control LEICI, UNLP, Argentina),
Dr. Jesús P. Marco (Universidad Politécnica de Valencia, Spain),
Dr. Dardo Marqués (Instituto Tecnológico de Buenos Aires –ITBA-, Argentina),
Dr. F. Márquez (Departamento de Ingeniería Química, Universidad de Concepción, Chile),
Dr. Jorge A. Martínez (Departamento de Física, UNLP, Argentina),
Ing. Osvaldo M. Martínez (Centro de Investigación y Desarrollo en Procesos Catalíticos, UNLP, Argentina),
Dr. Agustín Martínez-Feliú (Instituto de Tecnología Química, Universidad Politécnica de Valencia, Spain),
Dr. M. Mattea (Universidad Nacional de Río Cuarto –UNRC-, Argentina),
Dr. Miguel Mayoski (UNLP, Argentina),
Dr. Alfredo Mazzoni (Centro de Tecnología de Recursos Minerales y Cerámica, CIC, Argentina),
Dr. Max McDaniel (Phillips Research Center, Bartlesville, Oklahoma, USA),
Dr. Gregorio Meira (INTEC, Argentina),
Dr. Chijoke Mgbokwere (Scientific Research Laboratory, Ford Motor Company, USA),
Prof. Rubén Milocco (Universidad Nacional del Comahue, Argentina),
Prof. Federico Miyara (Universidad Nacional de Rosario –UNR-, Argentina),
Dr. Jorge Moiola (UNS, Argentina),
Dr. Carlos Muravchik (Lab. Electr. Instr. y Control LEICI, UNLP, Argentina),
Dr. Fernando Muzzio (Department of Chemical and Biochemical Engineering, School of Engineering, Rutgers University, USA),
Dr. Eduardo Nebot (Australian Centre for Field Robotics, The University of Sydney, Australia),
Dr. Dragan Nestic (Department of Electrical and Electronic Engineering, The University of Melbourne, Australia),

Dr. Carlos Neuman (INTEC, Argentina),
Dr. Brett Ninness (School of Electrical Engineering and Computer Science, The University of Newcastle, Australia),
Dr. John O'Connell (Dept. of Chem. Engng., University of Virginia, USA),
Dr. Maciej Ogorzalek (University of Mining and Metallurgy, Krakow, Poland),
Prof. Haydée Oliva (Fac. de Ing. Qca., Universidad de Zulia, Venezuela),
Dr. Fernando Paganini (Electrical Engineering Department, University of California, USA),
Dr. Daniel Pagano (Universidade Federal de Santa Catarina, Florianópolis, Brazil),
Dr. Hugo A. Palacio (Instituto de Física de Materiales, CIC, Univ. del Centro de la Pcia. Bs.As., Argentina),
Dr. Pablo Panzone (Departamento de Matemática, UNS, Argentina),
Prof. Eduardo Paolini (Departamento de Ingeniería Eléctrica, UNS, Argentina),
Lic. C. Parpaglioni (UBA, Argentina),
Dr. Pablo Parrilo (ETH, Switzerland),
Dr. Mireille Percec (Departamento de Química Inorgánica, Analítica y Química Física, UBA, Argentina),
Dr. J. R. Pérez (Departamento de Ingeniería Química y de Bioprocesos, Pontificia Universidad Católica de Chile, Chile),
Dr. Juan Perez-Ipiña (Universidad Nacional del Comahue, Neuquén, Argentina),
Dr. Mario Pérez-Won (Universidad de La Serena, Chile),
Dr. J. C. Pinto (COPPE, Brazil),
Dr. G. Pirez (INGAR, Argentina),
Dr. Silvina Ponce-Dawson (UBA, Argentina),
Dr. George Popkirov (University of Kiel, Germany),
Dr. José M. Porto López (Instituto de Investigaciones en Ciencia y Tecnología de Materiales, Univ. Nac. de Mar del Plata – UNMP-, Argentina),
Dr. Dionisio Posadas (Inst. de Inv. Físicoquímicas Teóricas y Aplicadas, UNLP, Argentina),
Dr. Francisco Povolo (Centro Atómico Constituyentes, CONEA, Argentina),
Dr. Przybylski (Department of Foods and Nutrition, University of Manitoba, Canada),
Dr. Mario Quarantelli (Centro Studi per la Medicina Nucleare, Napoli, Italy),
Dr. Lidia Quinzani (PLAPIQUI, Argentina),
Dr. D. Radic (Facultad de Química, Pontificia Universidad Católica de Chile, Chile),
Dr. Raul Radovitzky (Aeronautics and Astronautics, MIT, USA),
Dr. Daniel Resasco (University of Oklahoma, USA),
Dr. Jorge G. Reyna Almandos (Centro de Investigaciones Ópticas, CONICET, UNLP, Argentina),
Dr. B. Rivas (Facultad de Ciencias Químicas, Universidad de Concepción, Chile),
Dr. M. Roeckel (Departamento de Ingeniería Química, Universidad de Concepción, Chile),
Dr. Marta Rosen (Universidad de Buenos Aires –UBA-, Argentina),
Dr. Susana Rosso de Sánchez (Instituto de Investigaciones en Ciencia y Tecnología de Materiales, UNMP, Argentina),
Dr. C. Rozas (Universidad de Santiago de Chile, Chile),
Dr. Héctor Rotstein (RAFAEL and Technion, Israel),
Dr. Rodolfo Rubio-García (Facultad de Farmacia y Bioquímica, UBA, Argentina),
Dr. A. Rubiolo (INTEC, Argentina),
Prof. Ruiz Reina (Escuela Universitaria Politécnica, Universidad de Málaga, Spain),
Dr. Angela Russo (Università di Cassino, Italy),
Dr. A. Saavedra (Departamento de Ingeniería Química, Universidad de Santiago de Chile, Chile),
Dr. F. Saita (INTEC, Argentina),
Dr. R. C. Salvarezza (UNLP, Argentina),
Dr. Mario A. Sánchez (Departamento de Ingeniería Metalúrgica, Universidad de Concepción, Chile),
Dr. Mabel Sánchez (Plapiqui, Argentina),
Dr. Ricardo Sánchez-Peña (CONAE –Comisión Nacional Aeroespacial-, Argentina),
Dr. D. Sbárbaro (Departamento de Ingeniería Eléctrica, Universidad de Concepción, Chile),
Dr. Carlos E. Schvezov (Facultad de Ciencias Exactas, Químicas y Naturales, Univ. Nacional de Misiones, Argentina),
Dr. H. Segura (Departamento de Ingeniería Química, Universidad de Concepción, Chile),
Dr. María Seron (Centre for Integrated Dynamics and Control, The University of Newcastle, Australia),
Dr. E. Serrano (UBA, Argentina),
Dr. Leang Shieh (University of Houston, USA),
Dr. Troy Shinbrot (Department of Biomedical Engineering, Rutgers University, USA),
Dr. Silvio Simani (Dipartimento di Ingegneria, Università di Ferrara, Italy),
Dr. George Siouris (Air Force Department, USA),
Dr. Joao B. P. Soares (FCIC, Department of Chemical Engineering, University of Waterloo, Waterloo, Canada),
Dr. Rubén Spies (Instituto de Matemática Aplicada del Litoral, IMAL, Argentina),
Dr. Hebertt Sira-Ramírez (CINVESTAV-IPN, Mexico),
Dr. Jorge Solsona (Universidad Nacional del Comahue –UNC-, Argentina),
Dr. Z. Spekuljak (INGAR, Argentina),

Dr. M. K. Stenstrom (Civil and Environmental Engineering Department, UCLA, USA),
 Dr. Mario Storti (INTEC, Argentina),
 Dr. Miriam Strumia (Dept. Química Orgánica, Univ. Nac. Córdoba, Argentina),
 Dr. Shankar Subramaniam (Department of Mechanical and Aerospace, School of Engineering, Rutgers University, USA),
 Dr. Mario Sznajer (Penn State University, USA),
 Prof. Eduardo Tavani (Universidad Nacional de La Plata, Argentina),
 Dr. Roger Temam (Université de Paris, France),
 Dr. A. Trejo (Transformación Industrial, Instituto Mexicano del Petróleo, Mexico),
 Ing. Sara Tressens (UBA, Argentina),
 Dr. M. I. Troparevsky (UBA, Argentina),
 Ing. Alicia Ulla (INCAPE, Univ. Nacional del Litoral, Argentina),
 Dr. Mirna Urquidi-Macdonald (Penn State University, USA),
 Dr. J. Valderrama (Universidad de la Serena, Chile),
 Prof. Fernando Valenzuela (Universidad de Chile, Chile),
 Dr. Claudia Vallo (INTEMA, Mar del Plata, Argentina),
 Dr. Tomás Vargas (Departamento de Ing. Metalúrgica, Universidad de Chile, Chile),
 Dr. J. Vega (INTEC, Argentina),
 Dr. R. Vega (Departamento de Ingeniería Química, Universidad de Santiago de Chile, Chile),
 Dr. Marcelo Villar (PLAPIQUI, Argentina),
 Dr. Roberto C. Villas Bôas (Centro de Tecnología Mineral, International Materials Assessment & Application Centre, Rio de Janeiro, Brazil),
 Dr. María Volpe (PLAPIQUI, Universidad Nacional del Sur, Bahía Blanca, Argentina),
 Dr. E. Wolf (University of Notre Dame, USA),
 T. Yang (University of California, Berkeley),
 Dr. Yazdani-Pedram (Universidad de Chile, Chile),
 Dr. M. Zabaloy (PLAPIQUI, Argentina),
 Dr. J. H. Zagal (Universidad de Santiago de Chile, Chile),
 Dr. M. Zaiat (Departamento de Hidráulica e Saneamento, Universidade de São Paulo, Brazil),
 Dr. Aníbal Zanini (Automatización y Control Industrial, Universidad Nacional de Quilmes, Argentina),
 Dr. C. Zaror (Departamento de Ingeniería Química, Universidad de Concepción, Chile),
 Dr. Ezra Zeheb (Technion, Israel).

Revision process: The manuscripts are classified in one of five subject areas after being received by the Editor-in-Chief, Dr. Alberto Bandoni, and then they are being assigned to one of the Subject Editors. The Subject Editor sends the manuscript to two independent reviewers (one preferably residing in Latin America and the other in a well developed country in North America, Europe, Asia or Oceania) who produce the revision between two to six months. If the work is accepted, the Editorial Board makes suggestions-corrections in order to fit the author's style into the adopted "camera-ready" format of the Journal. This process takes normally four months and then the paper is put in the queue of manuscripts "in press".

Periodicity over the last thirteen years: During the last twelve years, LAAR has published the following volumes and issues:
 Year 1993, Volume 23: three issues with a total of 260 pages (28 articles, average article length 9.2 pages).
 Year 1994, Volume 24: four issues with a total of 278 pages (35 articles, average article length 7.9 pages).
 Year 1995, Volume 25: four issues with a total of 275 pages and one (1) supplementary volume with a total of 90 pages (46 articles, average article length: 7.9 pages).
 Year 1996: Volume 26: three issues with a total of 250 pages and one (1) supplementary volume of 108 pages (49 articles, average article length 7.3 pages).
 Year 1997: Volume 27: three issues with a total of 256 pages (30 articles, average article length: 8.5 pages).
 Year 1998: Volume 28: three issues with a total of 279 pages (40 articles, average article length: 6.9 pages).
 Year 1999: Volume 29: three issues with a total of 277 pages (38 articles, average article length: 7.3 pages).
 Year 2000: Volume 30: four issues with a total of 374 pages (48 articles, average article length: 7.79 pages).
 Year 2001: Volume 31: five issues with a total of 557 pages (79 articles, average article length: 7.05 pages).
 Year 2002: Volume 32: four issues with a total of 342 pages (52 articles, average article length: 6.57 pages).
 Year 2003: Volume 33: four issues with a total of 488 pages (74 articles, average article length: 6.59 pages).
 Year 2004: Volume 34: four issues with a total of 288 pages (40 articles, average article length: 7.20 pages).
 Year 2005: Volume 35: four issues with a total of 336 pages (48 articles, average article length: 7.00 pages).

Number of accepted manuscripts per year during the last three years: 56.

Number of published papers (average) per year during the last twelve years: 46.58.

Percentage of accepted manuscripts over received manuscripts: The rate is about 60 to 80 % depending on the Subject Editors.

Affiliation of the LAAR contributors in the world for papers published in the period 1988-1993:

Argentina (58.2 %), Latin America (20.64 %), Europe (14.3 %), USA and Puerto Rico (4.96 %) and Asia (1.9 %). Figure 1 indicates clearly these contributions grouped by regions in the world.

Figure 1: Affiliation of LAAR contributors in the world for papers published in 1988-1993.

For the period 1996-1998 the affiliations (grouped in regions) of the contributors to LAAR changed as follows: Argentina (52.57 %), Latin America (33.61 %), Europe (9.72 %), and USA (4.05 %). Figure 2 shows a similar graph containing this information. Out of 119 published papers in the period 1996-1998, they correspond to the following geographical regions (countries): Argentina 62.56; Brazil 26.10; Venezuela 5.50; USA 4.83; Chile 4.25; Spain 4; Mexico 3.50; Germany 2; Italy 1; France 1; Belgium 1; Netherlands 1; United Kingdom 0.75; Cuba 0.66; Denmark 0.5 and Austria 0.33, where the fractions correspond to any work with authors with different affiliations (for example, one paper with 2 argentine authors and one US author is computed as 0.666 to Argentina and 0.333 to USA).

Figure 2: Affiliation of LAAR contributors in the world for papers published in 1996-1998.

Figure 3 shows a similar graph containing the information for the period 1999-2002. Out of 217 published papers in the period 1999-2002, they correspond to the following countries: Argentina 109 (50.26 %); Brazil 45.84 (21.12 %); USA 16.69 (7.69 %); Mexico 7.75 (3.57 %); Chile 7.23 (3.33 %); Spain 4.24 (1.95 %); Cuba 4.19 (1.93 %); China 4.08 (1.88 %); Japan 3.86 (1.78 %); Italy 2.83 (1.30 %); France 2.16 (1 %); Germany 2 (0.92 %); Israel 1.66 (0.76 %); United Kingdom 1.16 (0.53 %); Australia 1 (0.46 %); Venezuela 1 (0.46 %); Portugal 0.80 (0.36 %); Sweden 0.50 (0.23 %), etc. The distribution by regions is: South America 75.18 %, North America 11.38 %, Europe 6.31 %, Asia 4.43 %, Caribbean Islands 1.93 %, Oceania 0.46 % and Africa 0.15 %.

Figure 3: Affiliation of LAAR contributors in the world for papers published in 1999-2002.

The five research areas of the Journal are distinguished in the period 1999-2003 (see Fig. 4). Chemical Engineering covers 48.8 %, Control and Information Processing 28.8 %, Applied Chemistry 12 %, Applied Mechanics 6.5 % and Heat and Mass Transfer 3.8 %. All the special issues concerning ENPROMER Conferences have been included as Chemical Engineering matters for the sake of simplicity. In the same way, all the special issues concerning RPIC Conferences have been included as Control and Information Processing matters.

Figure 4: Classification of published papers in the different disciplines of the Journal considering the period 1999-2003.
